

Recipe Name:	Hepatitis C
Rationale:	As there is now a cure for hepatitis C, we want to identify patients diagnosed with hepatitis C and recall them for treatment and care
Target:	Find patients with a coded diagnosis of hepatitis C

STEP 1:

Load an extract

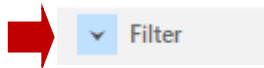

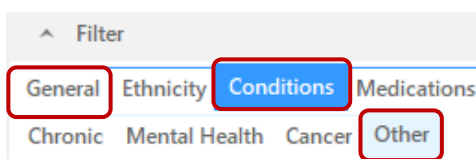

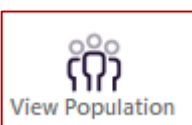

An extract is a snapshot of your patient database at a set point in time. To load an extract, follow the steps below.

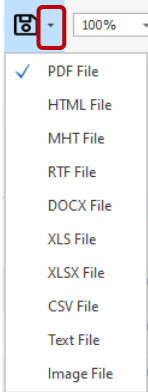

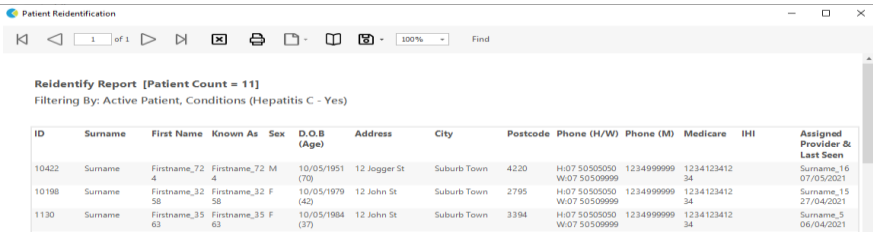

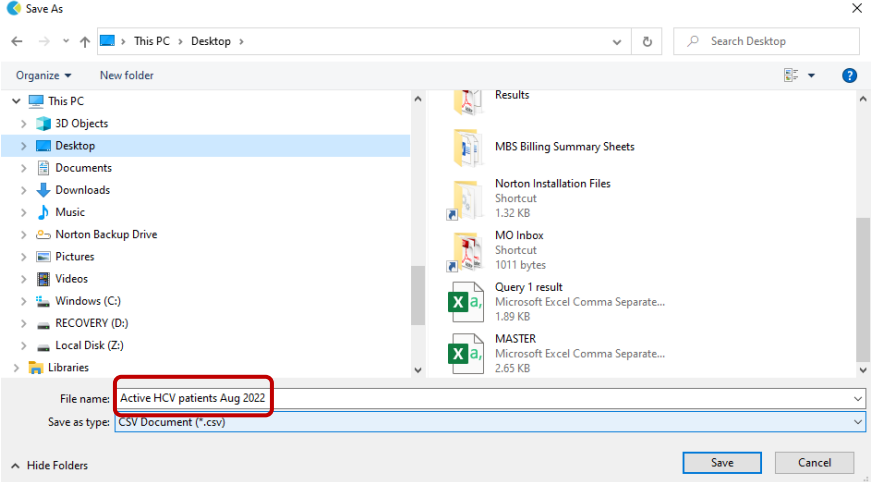

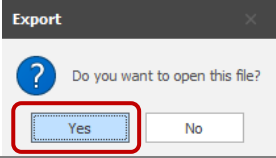

STEP	ACTION	REFERENCE
1	Expand the 'Extracts' column by selecting the arrow above the 'Show Extracts' panel to the left of the screen	
2	Then click once on the most recent extract to load the data into the available reports for further analysis	
3	Click the arrow above 'Hide Extracts' to remove the list from view and maximise the available screen space	

STEP 2:

Search for all active patients with a coded diagnosis of hepatitis C

STEP	ACTION	REFERENCE
1	Click on the arrow adjacent to the Filter drop down to expand the list of available filters	
2	<ul style="list-style-type: none"> Select the 'General' tab Tick to select 'Active (3x in 2 years)' Select the 'Conditions' tab then select 'Other' 	
3	Tick ' Hepatitis C '	
4	Once filters are selected, click on Recalculate and wait until the green bar fills which signifies filtering is complete	
5	Click ' View population ' to generate a list of all patients with a coded diagnosis of Hepatitis C in your patient information system. The list will be displayed on the screen	

<p>6</p>	<p>To export the list to a file, select the arrow adjacent to the floppy disk icon</p>

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

1. Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records.
2. Phone patients to update their record.
3. Produce a mail merge to recall patients for follow-up.

STEP 3:

Save and re-use the search query

Each time you want to search for the list of active patients with a coded diagnosis of hepatitis C, re-use the same query instead of rebuilding it.

STEP	ACTION	REFERENCE
1	Select Saved Filters tab	
2	Select ' Save New Filter ' button	
3	<ul style="list-style-type: none"> Enter a name to describe the search (e.g. Active patients with Hepatitis C) Click OK 	
4	To re-use the saved search, navigate to the Saved Filters tab and highlight the filter to be applied to the current dataset.	
5	Select Recalculate to populate all of the reports in CAT4 with patients matching the search filter	
6	Select the View Population button to generate a list of patients in the current extract that meet the criteria in the saved search
